Portfolio

E-commerce Website: An ecommerce website was developed using the concepts of react js and with the use of fakestore api. This project properly focused on making the ui user friendly and also had the features as cart, delivery address, Wishlist etc.

Portfolio-Website : Here a website containing my details and experiences are properly demonstrated.

EkNepal Website : This is a news portal having different fields where I was given the task to create a candlestick chart and fetch the data as well as showcase the share indices with the proper calculation.

Member Tracker : This is the app developed using pure html, css and javascript that gives the information about the organization to the members planning to join certain organization.

Weather App: This app was built using react js which was done by fetching the weather api and showing the weather on the basis of the current location.

Meeting Scheduler: This is another project used to schedule a meeting with a person on the basis of the time zone done with the help of react js

YouTube Cloning: This app was also built with the react js where a user is able to play the videos available there.

Skills :

- Proficiency in HTML, CSS, Tailwind Css, JavaScript, Typescript
- Proficiency in React JS, Axios and Redux Toolkit
- Knowledge of wordpress and other frontend tools.
- Proficiency in working with APIs from backend.
- Proficiency in making user-friendly and responsive websites.

Achievement

Winner of Hult prize, IOST 2018 Tribhuvan University hosted this competition so that IT students could present their company ideas to experienced entrepreneurs. This competition helped me to improve my communication skills and helped me build the confidence.
